

Skin cancer?

Identify and treat today.

The most important approach is to recognise a significant skin lesion. You need to know all the variants of skin cancers such as BCC, SCC and melanoma. You also need to recognise common benign lesions that may signify an underlying non skin malignancy associated with various syndromes.

Dr Mihaela Gugula offers at her clinic Feel Good Look Younger specialised skin cancer preventions and treatments:

- Skin checks
- Skin cancer prevention
- Medical and surgical treatment options
- Photo dynamic therapy

**2 out of 3 Australians are diagnosed with skin cancer by the time they are 70.
Don't become part of the statistic.**
